4. Conclusion/Certification

March 23, 2025

To Whom It May Concern,

I certify that the preceding report, "Ascenda TFL ASME A17.1 Compliance Report," and corresponding referenced analysis have been prepared with attention to the relevant Codes, Standards, and Common Engineering Practices. The design and analysis results are compliant with the ASME A17.1-2022 Code Requirements and with corresponding requirements in previous or subsequent Code Editions.

Both conventional analytical modeling and computational modeling methods were used in the component physical analysis. In circumstances where theoretical analysis is impractical, the Finite Element Method, or FEA (for Finite Element Analysis), was used in conjunction with physical testing. FEA is an advanced computational method of resolving internal stresses within parts with complex geometry and/or loading. Performance of certified parts has been confirmed with physical testing where noted.

This certification is subject to the disclaimers and limitations listed herein.

Mr. Joseph Newstrom, PE
